DRINK HOT WATER IF YOU DESURE A rosy complexion

better and feet better after an inside bath.

To look one's best and feel one's best is to enjoy an inside bath each morning to flush from the system the previous day's waste, sour fermentations and poisonous toxins before it is absorbed into the blood. Just as coal, when it burns, leaves behind a certain amount of incombustible material in the form of ashes, so the food and drink taken each day leave in the alimentary organs a certain amount of indigestible material, which if not eliminated, form toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishment

through the very ducts which are in-tended to suck in only nourishment to sustain the body.

If you want to see the glow of healthy bloom in your cheeks, to see your skin get clearer and clearer, you are told to drink every morning upon arlsing, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washings the waste material and toxins from the stomach, liver, kidneys and bowels, thus cleansing, sweetening and purifying the entire alimentary tract, before putting more food into the stom-

Men and women with sallow skins, liver spots, pimples or pallid complexion, also those who wake up with a coated tongue, bad taste, nasty breath, others who are bothered with headaches, bilious spells, acid stomach or constipation should begin this phos-phated hot water drinking and are assured of very pronounced results in

one or two weeks.

A quarter pound of limestone phosphate costs very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and freshens the skin on the outside, so hot water and limestone phosphate act on the inside organs. We must always consider that internal sanitation is vastly more important than outside cleanliness, be-cause the skin pores do not absorb-impurities into the blood, while the bowel pores do.

College Club Mooted.

A meeting of men and women college graduates is to be called here at an early date, for the purpose of determining whether sufficient enthusiasm exists for the formation of a College club. Danielson and vicinity has a large number of persons who have been graduated from the higher institutions of learning. If such a club is formed and favor is being shown the project, it is probable that a lecture course will be arranged. It is also anticipated that such a club would stimulate interest relative 'to taking college courses here and that more high school graduates would do so, and to further that end it is proposed, if a College club is formed, to create a fund for providing a scholarship to be competed for by Killingly high school students. OPPOSING NEW RATES. Putnam Chamber of Commerce Joins

Boston Against Proposed Freight

Southeastern carriers have made new rates on all southbound freight from January let, and have made this increase bear on New England more heavily than on New York, ranging from 40 cents to a dollar a ton. Since

990,858.74

bound rates will be raised, probably within a year from now.

The Putnam Chamber of Commerce directors were prompt to take a hand, and authorized the committee headed by W. N. Chandler, manager of the Transportation bureau of the Boston chamber, to protest in their name. The meeting at which Mr. Chandler was chosen to head the committee was attended by representatives from many cities and commercial bodies, and is well suited to speak for New England shippers.

The first step taken was to ask the authorities to suspend the proposed tariffs pending an investigation. This the suspension board of the Interstate Commerce commission declined to do, with the statement that this was not an opinion, but merely a refusal to interfere. Next, a formal protest was filed; and this will be called for a hearing soon.

Meanwhile, arrangements have been made with Francis R. James, of Washington, D. C., to represent New England interests if it is certain that the fight will be made. The committee takes the ground that the commercial bodies have no funds for legal expenses in a case that affects a class of members only. If the shippers who will pay these freights southbound and the manufacturers whose customers will have to pay the increased cost if they continue to buy New England made goods, are not willing to pay for protecting their own interests, then they will be to blame, and will have to suffer.

It is estimated that \$10,000 will be required for this work. Boston will undoubtedly raise the most of this amount; but others must join, and contributions are coming in. Funds will be received by the Putnam

present being representative of a number of towns in this section. Study of fertilizer and lime, breeds of door decades, the Boston fertilizer and lime, breeds of door decades, the Boston fertilizer and lime, breeds of door door cattle, milk secretion, ground of commerce has led more than one bundred New England commercial bodies in opening a fight against this threat to the industries of the addresses and discussions.
